

What Can Be Included In A SmartPay Lease?

With a simple application, approvals up to \$1,500, and no hidden fees, SmartPay is a great way for customers to get the phone and accessories they want with payments that fit their budget. But what items, if any, are off limits – what can be included in a SmartPay lease?

Lead With Leasing

Have the customer apply first. If approved, customers can pass on the phone they were settling for and lease the phone & accessories they really want but were hesitant due to budget limitations.

Bundle

Remind customers they can bundle phone and accessories if they stay within their approval amount

Lease More than Just Phones

Customers can lease tablets, connected devices, and unlocked devices. If your customer doesn't need a phone, they can lease any number of accessories as long as the combine value is over \$100
