

SMARTPAY[®]

What can be included with SmartPay?

With a simple application, approvals up to \$2,000, and no late fees, SmartPay is a great way for customers to get the phone and accessories they want with payments that fit their budget.

Lead With SmartPay

Have the customer apply first. If approved, customers can lease-to-own the phone and accessories they want instead of settling due to budget limitations.

Bundle

Remind customers that in addition to their phone, they can include the screen protector, the case, or the headphones they want. They just have to stay within their SmartPay approval amount.

Lease-to-Own More Than Just Phones

Customers can lease-to-own tablets, connected devices, and unlocked devices. If your customer doesn't need a phone, they can lease-to-own any number of accessories as long as the combined value is over \$100.
